

StableTable® - No ordinary tables!

StableTable are unique patented self-stabilising table bases for professional use in the hospitality industry. The table bases automatically adjust to any uneven surface and manage height differences of up to 20-25 mm. No more adjustment screws, folded napkins under table legs or wobbly tables.

Inside the centre pillar, well protected far away from gravel, dirt or other external influences sits the simple yet ingenious mechanical system that allows the legs to move and adjust to the ground while ensuring the correct height of the table. Due to the unique solution the table bases automatically adjust to both bumps and grooves and also take away approx. 50% of the tilt so that the tables easier align when placed next to each other.

Half-empty tables are annoying and revenue management is important and you need guests on all chairs. StableTable table bases are both light and easy to work with and you can easily move your tables around without them starting to wobble. Place two together as a 4-seater and if only two guests arrive pull the tables 10-15cm apart to create separate tables or set them as separate tables and move them together when necessary.

The tables are produced to the highest quality standards in an ISO-certified factory in Sweden and they are fully recyclable. Our special paint technique ensures that there is no chipping or flaking and the tables can be used outside all year round.

StableTable® - Flip Top!

StableTable Classic Flip Top is based on the same unique self-stabilising system as all StableTable bases. In addition, it is fitted with a high-quality flip top mechanism that allows the table top to flip 90 degrees. This makes them very compact to store and easy to lift in and out. StableTable Flip Top is the ideal solution for cafés or restaurants with limited storage area or where you move the tables in and out every day.

With less than 7 kg of weight and with a built-in handle they are very easy to manage. Simple to flip, easy to lift and efficient to store. StableTable Flip Top can be used with round, square and rectangular table tops in sizes from 60 cm up to 80 cm round, 50x50 cm to 70x70 cm square or anything between 50 and 70 cm rectangular. Use StableTable Flip Top in- or outside all year around on any type of surface!

Get all the functionality from StableTable self-stabilising tables and the ease of use from a flip top! Store up to 15 bases in the same space as 5 standard bases.
