

StableTable® Classic

When performance meets innovation

StableTable® Classic is a self-stabilising table designed to work in all types of venues from lovely AI fresco areas to busy food-courts. No more wobbly tables!

The table design follows the traditional cross-leg shape and fits just as well with a small café size table top as a large size dining top.

With its full range of heights and sizes the StableTable Classic product family gives you the flexibility to design according to your needs and dreams.

The patented StableTable® technology that sits well protected inside the table, automatically adjusts to both bumps and grooves and manages height difference up to 25 mm. Use StableTable® Classic wherever you want, on any type of uneven ground, outdoors or indoors. Even if guests start moving the table around, you will never again have a wobbly table!

StableTable® Classic at the Opera, Stockholm, Sweden
When Swedish innovation meets world-class performance, something extraordinary happens and a new design classic - solving real problems - is born

Design concept and benefits

StableTable® Classic table bases are available in several different x-leg lengths for all sizes of table tops. They fit just as well in the patio of a luxury hotel as in a modern bistro or food court where tables are moved all the time. The large tables are also popular at care homes and canteens thanks to the extended legs and larger top-cross which provide ultimate stability.

Classic flexibility

	Lounge	Dining					Counter	Bar
Height	50	72	72	72	72	72	90	108 cm
x-leg length	54	54	64	74	84	94	64	64 cm
